Dear Devon,

Thank you for materials send with regard to Metabiota project.

It looks very interesting.

While my time as government official I worked with such type of projects in other areas.

Although in order to grasp better whet we could do and where opportunity lies here we need to discuss it further in greater details. Please advise should I write some initial questions by email to you and you will forward them to person in charge or we could discuss in via skype or/and wher I arrive?

Regards, vadyim

Hi Hunter,

I hope you enjoyed a smooth flight across the pond and that this finds you and your wife enjoying a wonderful Friday in beautiful Lake Como!

Thanks so much for taking time out of your intense schedule to meet with Kathy and I on Tuesday. We very much enjoyed our discussion. As promised, i've prepared the attached memo, which provides an overview of Metabiota, our engagement in Ukraine, and how we can potentially leverage our team, networks, and concepts to assert Ukraine's cultural and economic independence from Russia and continued integration into Western society. The pdf comprises English and Ukrainian versions of the document.

Please let me know if you have any questions or require clarification. We look forward to hearing the outcome of your discussions on this topic.

Wishing you successful meetings and a great visit!

Best regards,  
Mary

Agreed we should go / no go by Monday AM EST.

Spent 60 minutes on the phone with Vadim today. They are in complete agreement in regards to the discrete nature of your Board role and they actually described the same before I repeated it.

People will discover this though from corporate filings or one way or another so we have to be ready for questions.

The President of Poland from 1995 - 2005 is doing a press release in the coming weeks directly related to the company and his strong support etc. Maybe you should do one final check on him. We'll be working closely with him. He is a gentleman and we spent a few hours together in Warsaw in some very engaged geopolitical dialogue. I am a big fan and I think the US is as well. But check.

You also have to be aware we'll have to roll up our sleeves here and work and do some travel on behalf of the company. They're organized and responsive so it's not wasted time but it's work and travel nonetheless.

My elephant hunt thoughts are that we have a chance to get in on the ground floor of the Gazprom of the U. If it doesn't result in trophy bull at minimum we're being compensated for the safari.

**Subject:** Re: MEMO: Ukraine Science

Dear Devon,

Please find few initial points to be discussed for the purposes of analyzing the potential of this as you called, "Science Ukraine" project.

1. Financing. As I understand the Metabiota was a subcontract to principal contactor of the DoD B&V. Today they seem to state that financing is closed. What was the reason of stopping the projects and financing of the projects? They look for a new financing. Do they expect to receive it again from B&V or they look for else were?
2. What kind of partnership Metabiota is looking for in Ukraine? From potential non-governmental player in Kiev? Rebuilt the ties with respective ministries in Ukraine, and on the basis of that reinstate the financing from the B&V? Or they look for partnership in managing projects in Ukraine, PR with Government institutions here, financing of the projects?

(( Metabiota counterparts in Ukraine were ( i.e. final beneficiary and the recipient of the results of the projects) were ministries of from Ukraine, Ministry of Agriculture and Ministry of Health. From the Ukrainian governmental point of you, it looks like standard International Assistance project, that could be technical, financial, etc))

3. The principal contactor B&V seems to be also the party that operates in Ukraine on the similar or the same projects. There is no competition here?

Best regards, vadym
